

```
'''
```

1) Write a Python program which accepts the user's first and last name and print them in reverse order with a space between them.

```
'''
```

```
import datetime
```

```
from calendar import calendar
```

```
FirstName=input("Enter your first name: ")
```

```
LastName=input("Enter your last name: ")
```

```
name=LastName+" "+FirstName
```

```
print(name)
```

```
'''
```

2) Write a Python program to print the calendar of a given month and year.

Note : Use 'calendar' module.

```
'''
```

```
import calendar
```

```
year=int(input("Enter your year: "))
```

```
month=int(input("Enter your month(1-12):"))
```

```
print(calendar.month(year,month))
```

```
'''
```

3) Write a Python program to calculate number of days between two dates.

[use datetime module]

Sample dates : (2014, 7, 2), (2014, 7, 11)

Expected output : 9 days

```
'''
```

```
date1=datetime.date(2014, 7, 2)
```

```
date2=datetime.date(2014, 7, 11)
```

```
diff=date2-date1
```

```
days=diff.days
```

```
print(days)
```

```
'''
```

Q.4) Write a Python program to test whether a

passed letter is a vowel or not.

```
'''
```

```
s1=input("Enter any letter: ")
```

```
if s1=='a' or s1=='e' or s1=='i' or s1=='o' or s1=='u':
```

```
    print("The given letter is vowel")
```

```
else:
```

```
    print("The given letter is not vowel")
```
